The items identified in this Information Disclosure Statement may or may not be "material" pursuant to 37 CFR §1.56 and the submission thereof by Applicant(s) shall not be construed as an admission that any such patent, publication or other information referred to therein is material or considered to be material (37 CFR §1.97(h)), or even qualifies as "prior art" under 35 USC §102 with respect to this invention unless specifically designated by Applicant(s) as such.

The filing of this Information Disclosure Statement shall not be construed to mean that a search has been made or that no other material information, as defined in 37 CFR §1.56, exists.

Attached is PTO Form 1449 listing the patents, publications and other information that may be material to the patentability of one or more claims of the subject application and copies of all such items are enclosed herewith.

With respect to the "concise explanation of the relevance" of the non-English language references as required by 37 CFR §1.98(a)(3), applicant has been unable to locate a translation of any of those three patents. Applicant's only knowledge with respect to the German reference is that it allegedly relates to cellphones for emergency calls, with motion, infrared or ultrasonic sensors for surveillance and security applications. With respect to the two Japanese patents, English translations of the Abstracts are provided herewith.

This Information Disclosure Statement is believed to be timely in that it is being submitted under 37 CFR §1.97(b)(3) before the mailing of a first Office Action on the
